FIGS

FIG. 1

FIG. 2

FIG. 3 is a perspective view of the machine of FIG. 1, showing the machine in a position for cutting a groove in a workpiece. The machine is shown in a position for cutting a groove in a workpiece. The machine is shown in a position for cutting a groove in a workpiece.

FIG. 10

FIG. 12 is a perspective view of the system 10, showing the control unit 34, the display unit 38, the input device 60, the output device 62, and the processing unit 80, all connected by a system bus 35. The control unit 34 is connected to the display unit 38, the input device 60, and the output device 62. The processing unit 80 is connected to the system bus 35. The system 10 is shown in a perspective view, with the control unit 34, the display unit 38, the input device 60, the output device 62, and the processing unit 80, all connected by a system bus 35.

FIG. 14

FIG. 15

FIG. 16 is a perspective view of the device 10 in a closed position. The device 10 includes a housing 12, a lid 14, and a base 16. The housing 12 is formed by a front panel 18 and a back panel 20. The lid 14 is hinged to the front panel 18 and is shown in a closed position. The base 16 is formed by a front panel 22 and a back panel 24. The front panel 22 includes a display 26 and a control panel 28. The back panel 24 includes a power supply 30 and a connector 32. The device 10 is shown in a perspective view, with the lid 14 and the front panel 22 being the most prominent features.

FIG. 28 is a perspective view of the system 10 in a closed position. The system 10 includes a base 12, a top cover 14, and a side cover 16. The base 12 is connected to the top cover 14 by a hinge 18. The side cover 16 is connected to the base 12 by a hinge 20. The system 10 is shown in a closed position, with the top cover 14 and side cover 16 covering the base 12. The system 10 is used for storing and protecting a device 22. The device 22 is connected to the base 12 by a cable 24. The device 22 is shown in a closed position, with the top cover 14 and side cover 16 covering the base 12. The system 10 is used for storing and protecting a device 22. The device 22 is connected to the base 12 by a cable 24. The device 22 is shown in a closed position, with the top cover 14 and side cover 16 covering the base 12.
